PROFESSIONAL SUMMARY

Results-driven Software and Cloud Engineer with over 2 years of combined experience in IT support, backend development, and cloud-based infrastructure.

Proficient in building scalable Java-based systems, developing intelligent machine learning models, and delivering secure, data-driven solutions.

Currently supporting enterprise IT operations at Auburn University at Montgomery while pursuing a Master's in Computer Science.

AWS Certified Cloud Practitioner skilled in CI/CD automation, infrastructure optimization, and predictive analytics using Python and ML frameworks.

Recognized for technical excellence and teamwork with multiple awards, including the "Best Employee of the Year" honor at Cognizant.

Eager to contribute analytical and problem-solving expertise to software engineering, DevOps, or data-driven cloud projects in a fast-paced environment.

EDUCATION

Auburn University at Montgomery (AUM) -- USA

Master of Science in Computer Science (Aug 2024 – May 2026)

- GPA: 3.6 / 4.0 | Coursework: Cloud Computing, Data Analytics

Eswar College of Engineering — India

Bachelor of Technology in Computer Science (Jun 2017 – Jul 2021)

- GPA: 3.4 / 4.0

PROFESSIONAL EXPERIENCE

IT Support Assistant | Information Technology Services (ITS), Auburn University at Montgomery — USA (Jan 2024 – Present)

- Provide Tier-1 technical support for university-wide hardware, software, and network systems.
- Utilize ServiceNow for ticketing and SLA tracking to ensure timely incident resolution.
- Troubleshoot performance issues, AV equipment setups, and system configurations.
- Document and update technical procedures to improve future efficiency.
- Collaborate with senior IT staff to enhance service reliability and operational performance.

Software Engineer | Cognizant Technology Solutions (Client: KeyBank) — India (Sep 2021 – Jul 2023)

- Developed and deployed backend Java microservices supporting high-volume banking transactions.
- Optimized RESTful APIs and batch workflows, improving system performance by 30%.
- Automated deployment and release workflows using CI/CD pipelines with Git, Jenkins, and XLR.
- Performed SQL-based data analysis, reporting, and query optimization in MS SQL Server.
- Conducted root cause analysis through ServiceNow to maintain compliance with SLAs.
- Partnered across Agile teams in U.S. and India; recognized with “Best Employee of the Year” award.
- Received 8 additional recognitions for innovation, automation, and outstanding project delivery.

TECHNICAL SKILLS

- Languages: Java, SQL, Python, C, C++, Data Structures & Algorithms
- Cloud & DevOps: AWS (EC2, S3, IAM), Terraform, Git, Jenkins, CI/CD, Docker (basic)
- Databases: Microsoft SQL Server, MySQL
- Web & Frameworks: HTML, CSS, Bootstrap, ASP.NET MVC (basic), React (beginner)

- Tools: ServiceNow, JIRA, Microsoft Excel (advanced), Postman
- Scripting: Bash, Python (automation & monitoring scripts)
- Soft Skills: Analytical Thinking, Communication, Collaboration, Process Optimization

PROJECTS

- Bug Tracker (Java, Spring Boot, React, MySQL) – Full-stack issue tracking system with authentication, role-based access, and cloud deployment using AWS EC2.
- Heart Disease Prediction System (Python, Machine Learning, Flask, Scikit-learn) – Built a predictive model to detect heart disease risks based on medical attributes such as cholesterol, glucose, and blood pressure. Deployed Flask-based REST API for real-time predictions, achieving 92% accuracy with Random Forest and Logistic Regression.
- Cloud Expense Tracker (React, Node.js, AWS) – Multi-user cloud-native expense tracker hosted on AWS S3 with SES-based email alerts and secure authentication.
- Product Review Sentiment Analysis (Python, NLP) – Analyzed product review data using Scikit-learn achieving 89% sentiment classification accuracy.
- Secure Transaction Workflow (Cybersecurity) – Built a secure transaction module with data encryption and authentication using cryptographic protocols.
- Student Management System (Java, JDBC, Swing) – Desktop application to manage student data, courses, and attendance with database persistence.

RECOGNITION & ACHIEVEMENTS

- Awarded “Best Employee of the Year” at Cognizant for excellence in delivery and innovation (2023).
- Earned 8 Recognitions for automation, innovation, and technical leadership on critical KeyBank projects.
- Reduced manual testing time by 25% through process automation and scripting.
- Consistently exceeded SLAs and maintained 100% uptime for supported services.
- Received multiple “Applause” awards for collaboration, quality, and high-impact delivery.

CERTIFICATIONS

- AWS Certified Cloud Practitioner – Amazon Web Services, 2024
- Preparing for AWS Solutions Architect – Associate (Expected 2025)

LEADERSHIP & ACTIVITIES

- Youth Ambassador – Nonprofit Tech Awareness Initiative: Conducted digital literacy sessions.
- Event Organizer – Academic & Corporate: Led multiple technical workshops and college fests.

CORE STRENGTHS

- Strong analytical mindset with proven experience in IT operations, predictive analytics, and cloud deployment.
- Proactive problem solver capable of streamlining workflows and improving service reliability.
- Quick learner of new technologies and enterprise software tools.
- Excellent communicator with cross-functional collaboration and Agile delivery experience.
